

### DESCRIPTION

This brass safety padlock comes with a hardened steel chrome plated shackle. It has a single locking, spring open and close and is non-key retaining. The padlock and two nickel plated brass keys (single key on request) are stamped with the lock number as standard and this padlock is suitable for use in all lockout/tagout systems.

### KEY FEATURES AND BENEFITS

- Padlock bodies and keys numbered as standard, enabling easily matching of separated components.
- Padlock numbers recorded for each customer to avoid duplications on site for future orders.
- Anti-pick mushroom pins and stainless steel springs, ensuring security and the life of equipment.
- Ideal for applications when applying a lock in a restricted space
- Padlocks are keyed alike

### APPLICATION

- Commercial
- Industrial
- Lockout/Tagout systems
- Internal or external applications
- Suitable in high temperature situations
- Restricted spaces

### RESISTANCE

- Rustproof
- Spark proof
- High Temperatures
- Caustic and corrosion environments

Ensuring that each employee has a unique padlock key is a cornerstone of any robust lockout programme. It guarantees that only one person can open each padlock ensuring everyone's safety.

The Sentinel lock control programme from Reece Safety guarantees your site will be free of duplicate locks both now and into the future. Being safe couldn't be easier, all padlocks provided can be logged in our unique Sentinel registration system, all brass padlocks are recorded as standard. Any repeat orders are checked against this database and new locks will be provided with new numbers to avoid duplication. What's more this service is completely free of charge and can be provided at either plant or company level, incorporating multiple sites. Please request when placing your order
